

HOW To, (DMSS app)

EXAMPLE: Play Store by Google, (Andriod devices)

Step 1: Search, download and Install from your app store

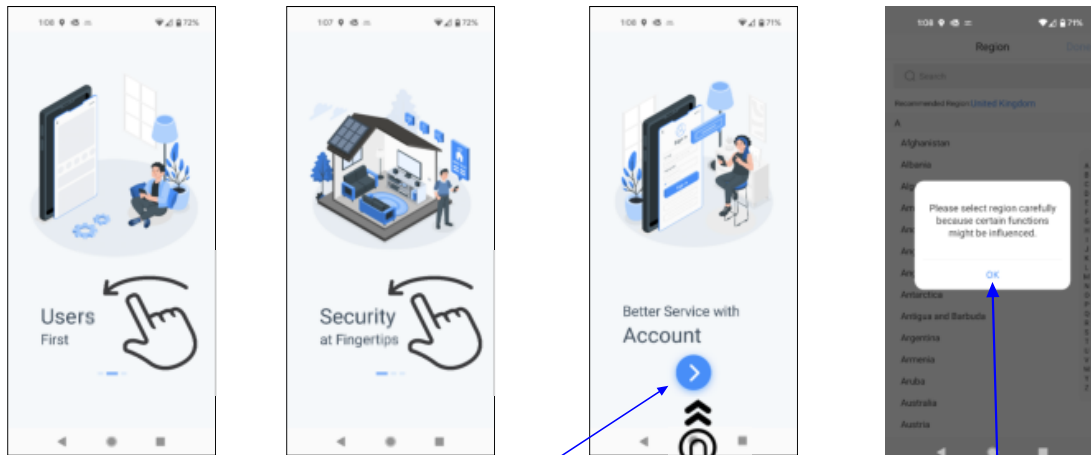

PLEASE NOTE: you may need to enter your device password to download the app

ALSO if you cant find the app, then your de vice is not compatible ;(

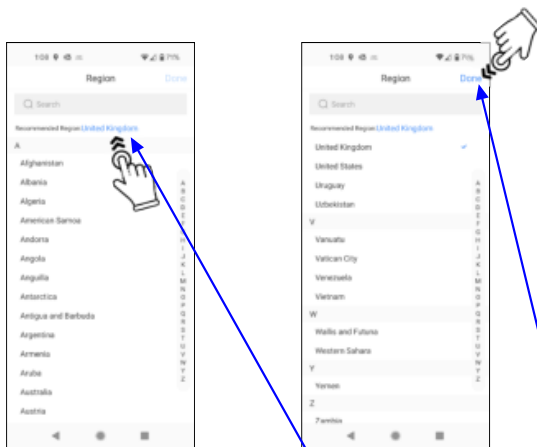

HOW To, (DMSS app)

Step 2: Activate the app on your mobile device

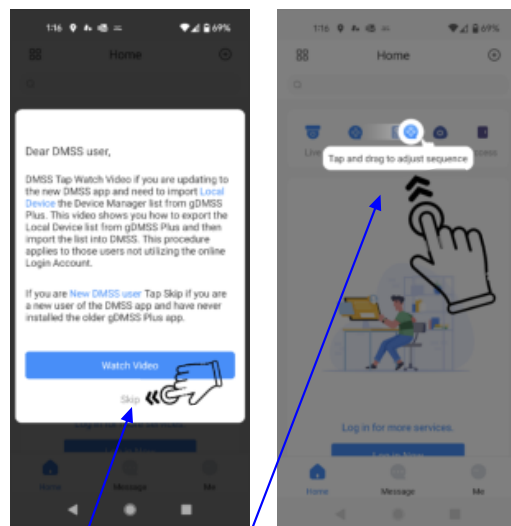

Swipe to the left, until you see the blue button

Click 'OK'

Select your region, by clicking 'United Kingdom', then click 'Done'

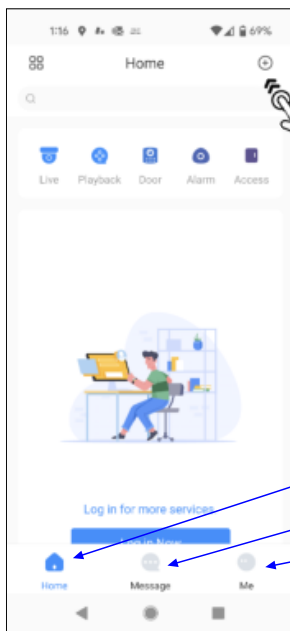

Tap the 'Skip' button, and Tap and Drag to activate the screen

HOW To, (DMSS app)

You will need to have your recorders QR code / serial number at hand. Also your recorder **MUST** be online

Step 3: Pair your device to the app

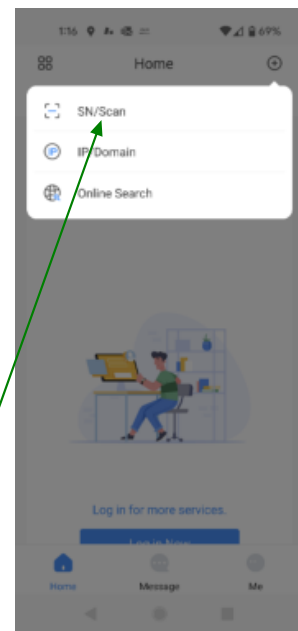

On the 'HOME' screen, you will **NOT** need to setup an account.

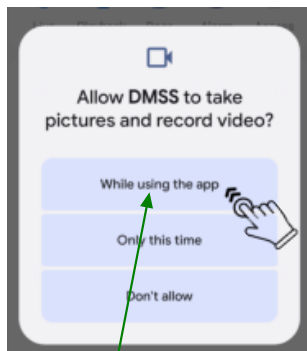

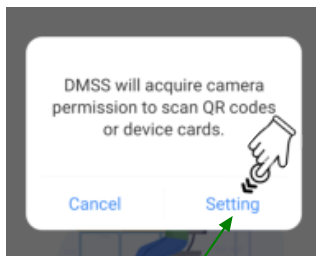

1st Click on the round circle with the +

While you are here take note of the following icons at the bottom of the screen:

Home
Message
Me

2nd Click on the 'SN/Scan' line

3rd The following screens should appear, if so click 'Settings', then click 'While Using the app'

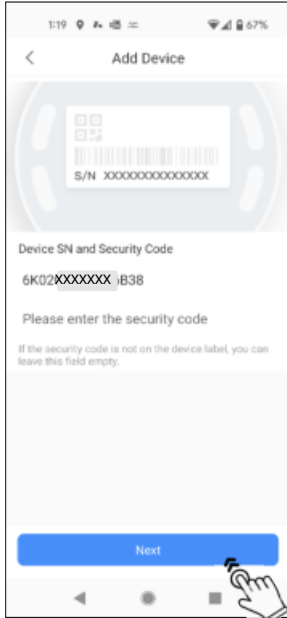

4th Your camera should then come on, hold your camera so the QR code is in the camera view, it will automatically take image.

If you don't have a camera, or you wish to enter the serial number manually then click this button.

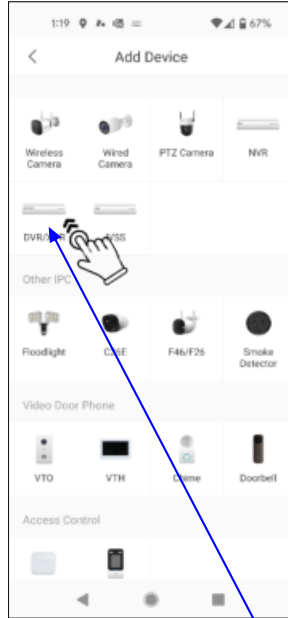

HOW To, (DMSS app)

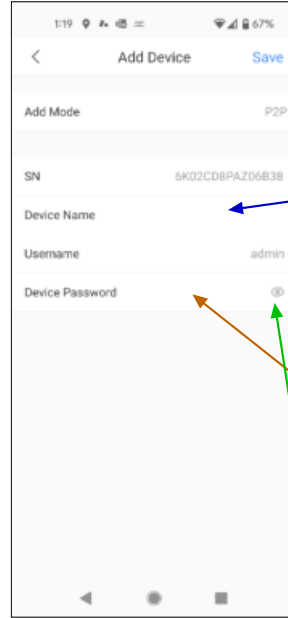

Step 3: Pair your device to the app continued

Click on the 'Next' button

We have to set the correct device: (in this example we are setting a DVR/XVR recorder).

THIS SCREEN WILL NOT APPEAR IF NOT ONLINE

Now you will need to add some details:

Device Name, (AKA): this can be anything you like, some people put a 'House name', or just 'Home CCTV'

Device Password: this was left with you when installed, remember its case sensitive ;)

TIP: You can untick the eye icon to see what you are typing

If your not sure about this, ask your installer :)

Click button, and your done :)
