DMSS
Doorbell Setup

Search your mobile device's app store for DMSS and install it on your device.

GET IN ON Google Play

Download on the App Store

When you open the app for the first time, you need to swipe accross the start-up screens and press the blue button the the last screen.

Tap "Log In" to begin

Log in

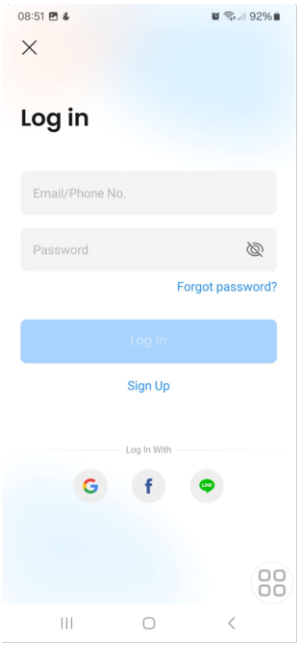

Create an account

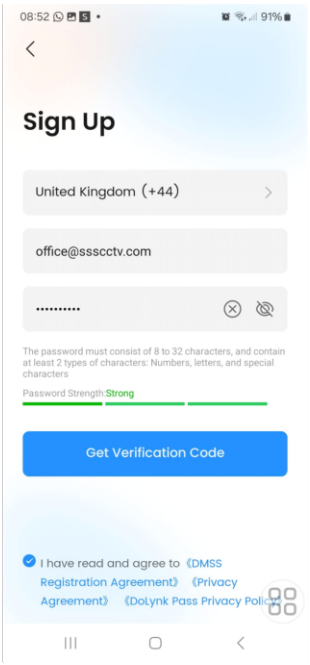

Tap “Sign Up”

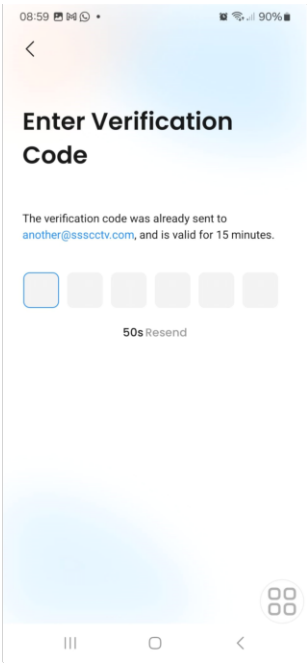

Enter your email address and choose a password

Check your email for a 6 digit code.

Cant see the email? Check your Spam / Junk folder

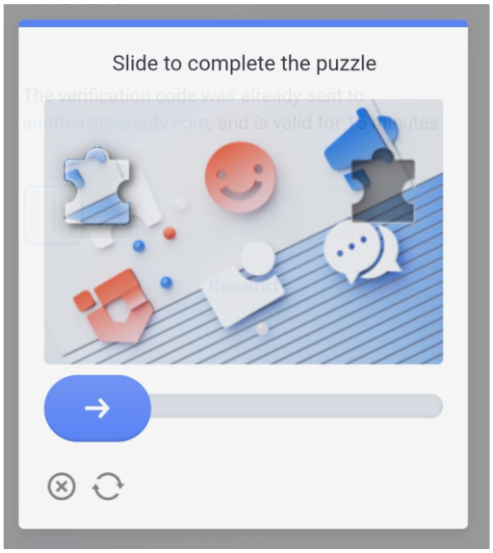

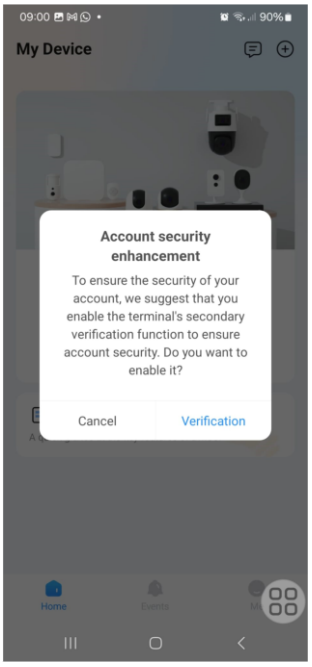

Enter this code and then move the arrow accross to match the jigsaw piece in the space.

Tap “Cancel”.
If you choose “Verification” this will use your device password or Face/Finger print ID to log in.

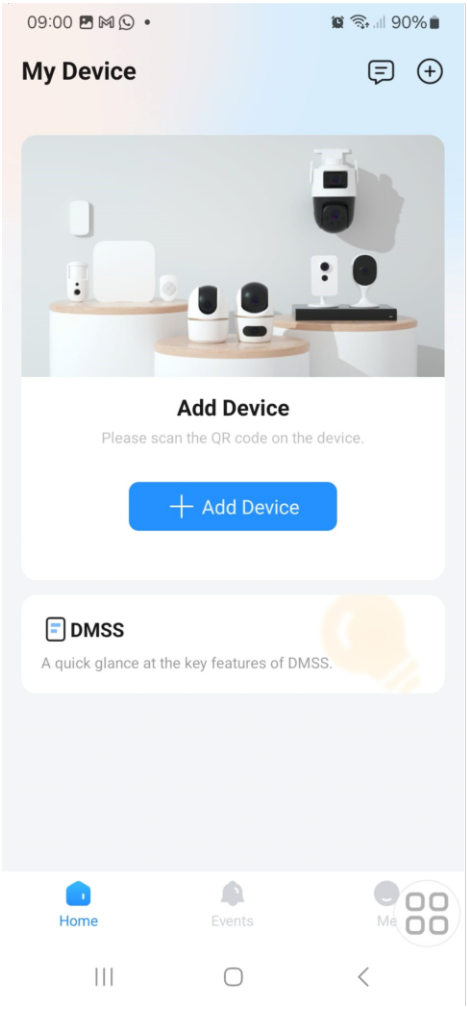

Pairing your doorbell

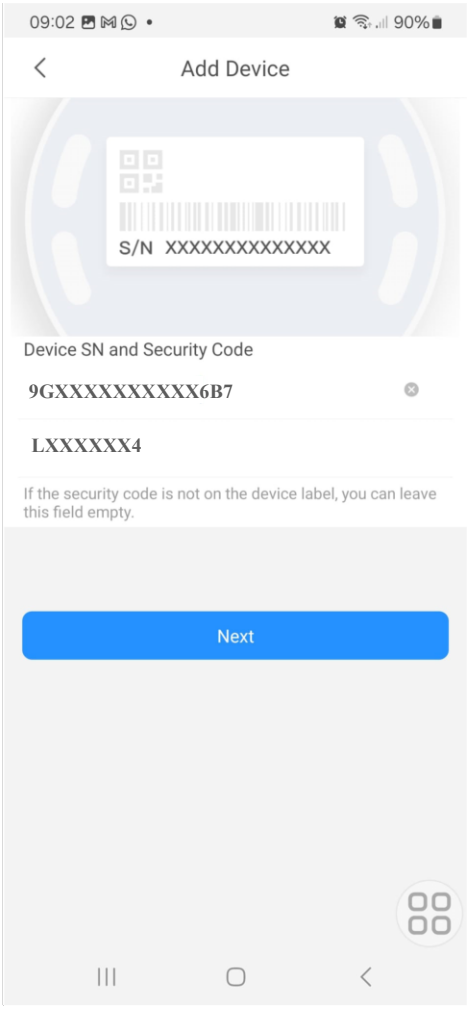

part 1

Tap the “Add Device” button, or the little ⊕ at the top right.

On the back of the doorbell is a little QR code, or on the paperwork in the box

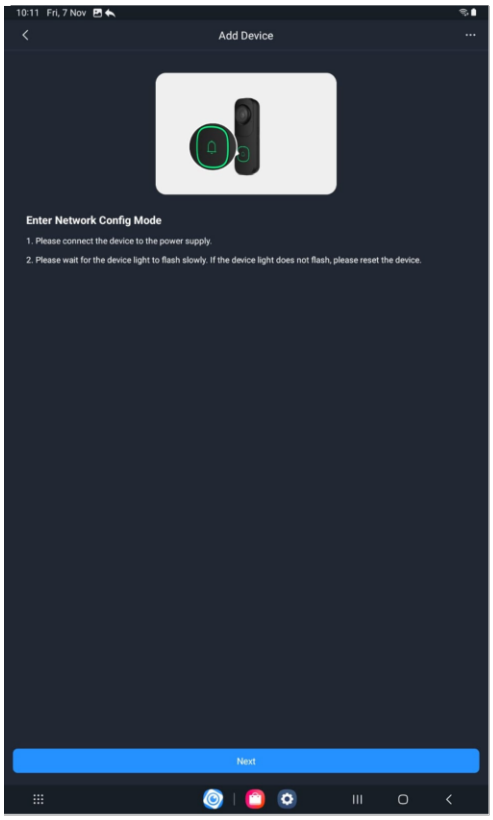

The Serial number and security code will automatically be entered, tap “Next”

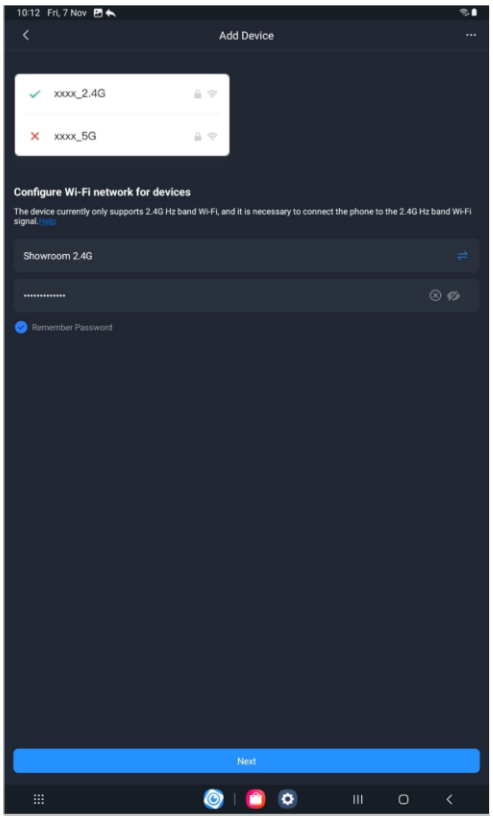

Pairing your doorbell

part 2

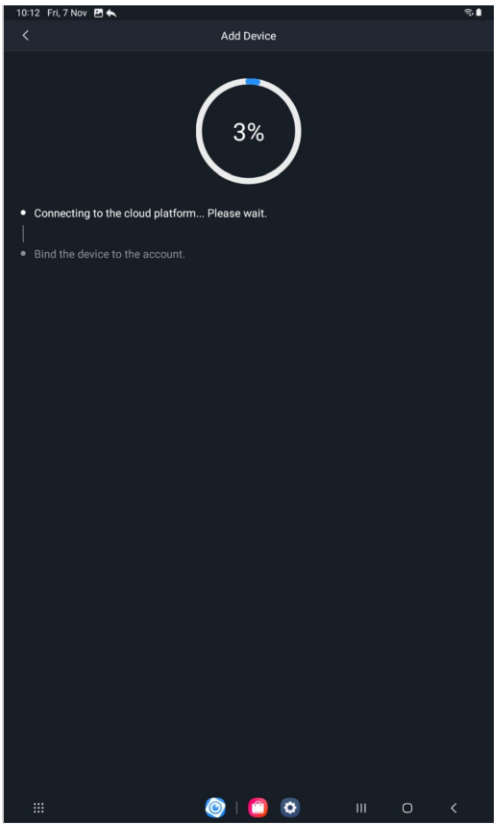

Tap “Next”

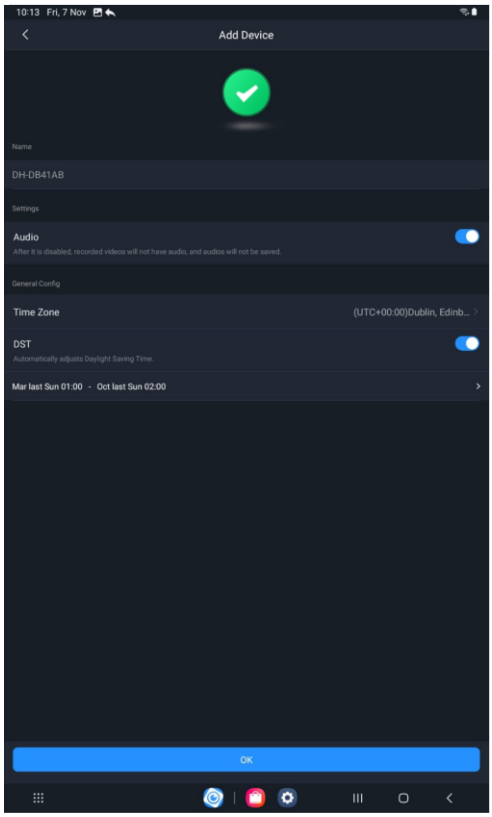

Find your closest WI-Fi network and enter the password

The doorbell will make some noises during the connection process

Set your doorbell name example Front Door, Side, Garage

Turn Audio On

Set Daylight Saving Time

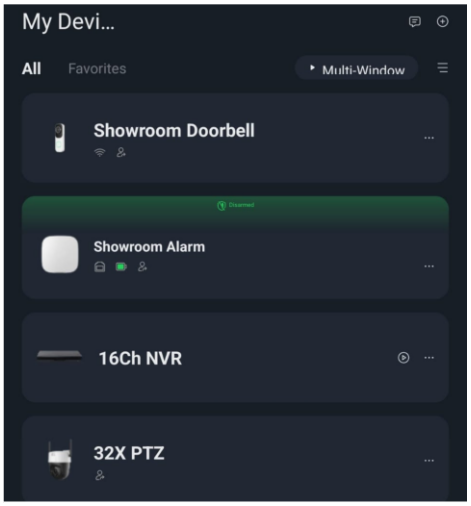

Tap “OK”

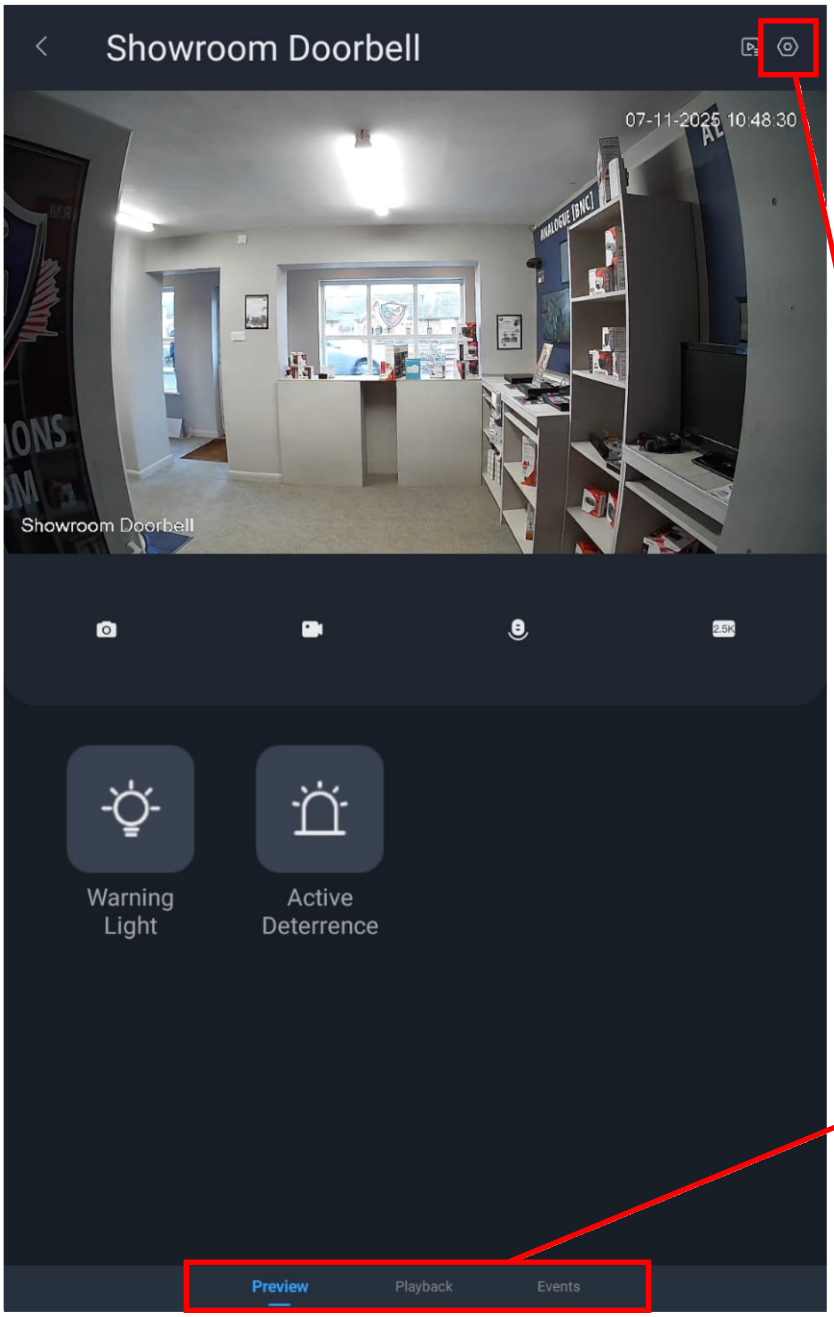

Pairing your doorbell

part 3

Your device will now be on the homescreen on the app, from here you can live view, remote playback, and set up SMD notifications.

Having trouble, email office@ssscctv.com.

Tapping your Doorbell will open a live image

Opening the “Settings” you can customise the motion area, connect external chimes, and turn your notifications on / off

Find yoursaved video using the “Playback” at the bottom of the screen
