Installing SmartPSSlite

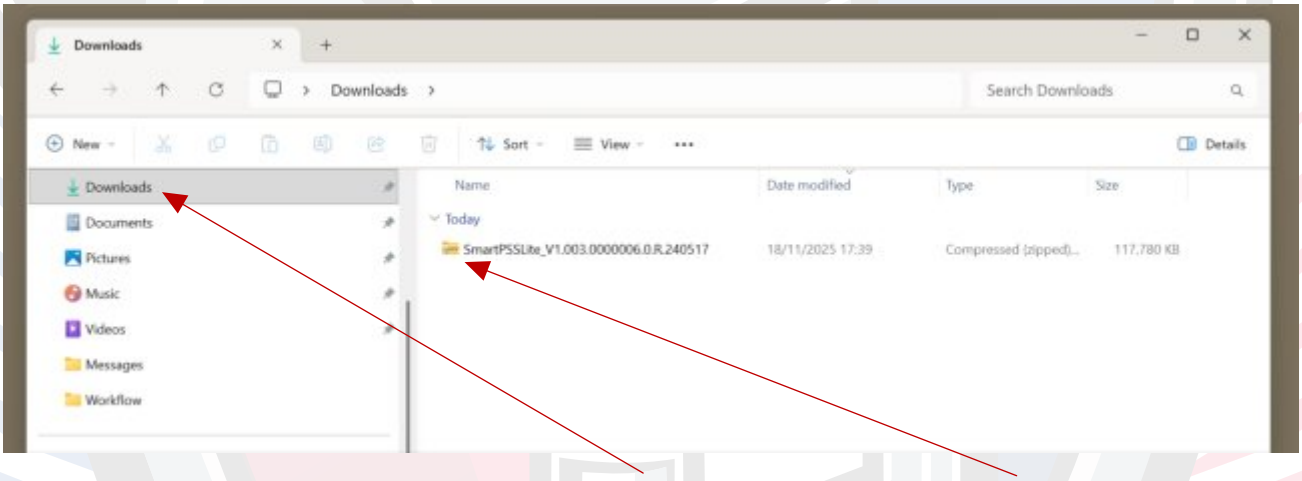

by Surveillance & Security Systems

1st Download SmartPSSlite from:
www.dahuawiki.com/SmartPSS_lite

Select your system, (here we shall download for Windows)

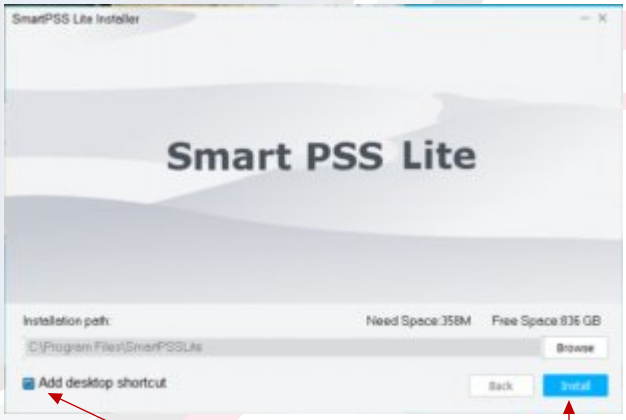

2: Open your 'Download' folder

Once downloaded, look in your 'Dowloads' folder and double click the icon

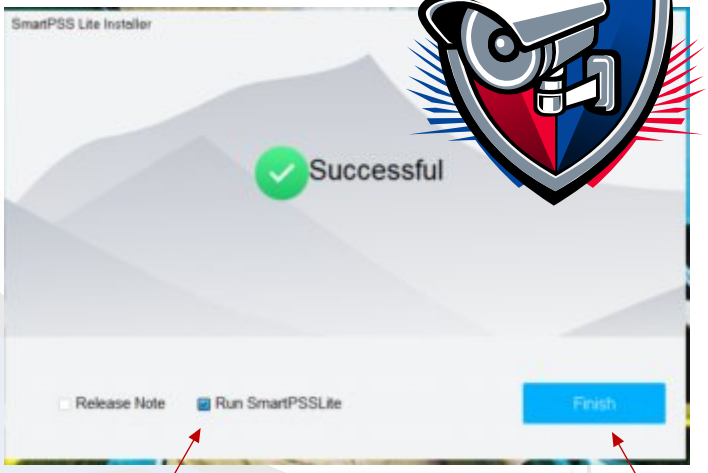

3: Tick to say you have read and agree the software agreement, then press 'NEXT

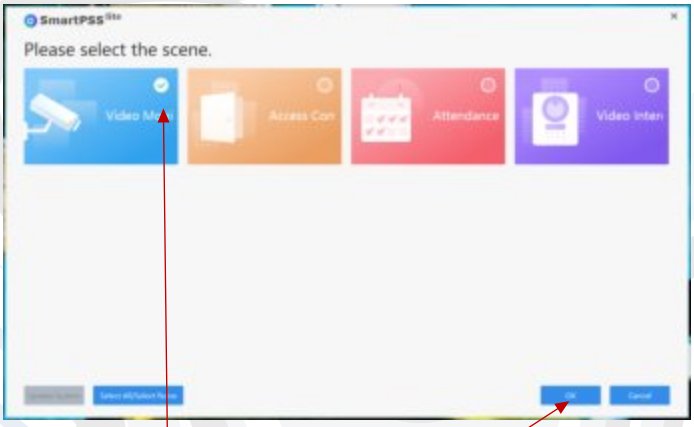

4: Tick to add desktop shortcut, then press 'NEXT

Smart PSS lite will now install... .. .

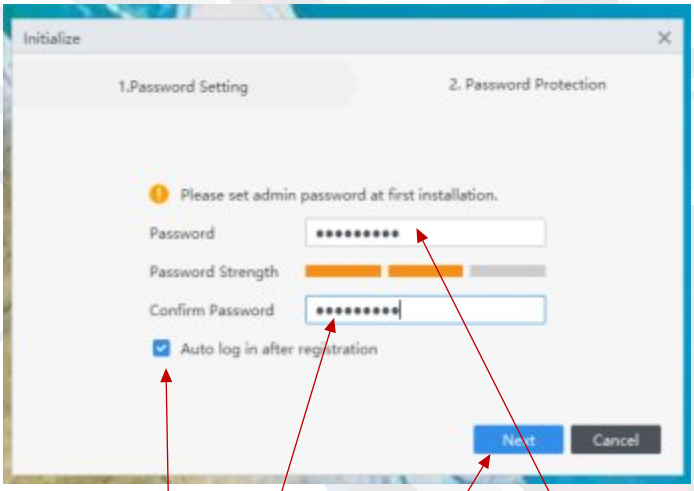

5: Tick the Run SmartPSSLite box, and click the 'Finish' Button

6: Tick 'Video Moni', then click the 'OK' button

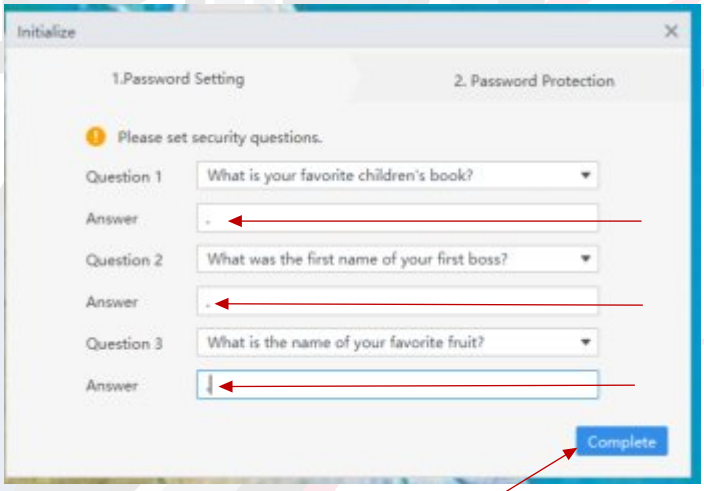

7: Tick the agree section, and click 'Agree' button

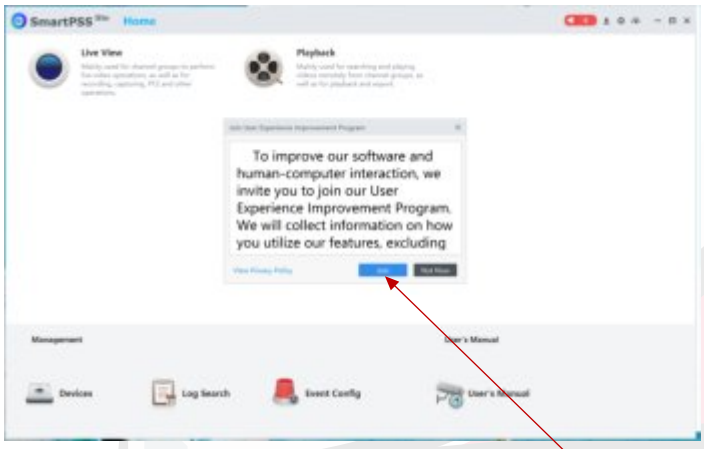

8: Once you have decided on a password: Type into the 'Password' section, and again in the 'Confirm Password' section.

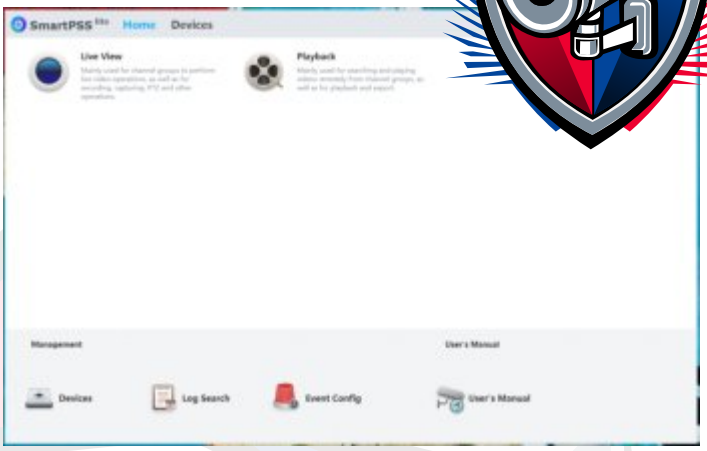

Tick the 'Auto log in after registration', if required then click the 'NEXT' button

9: Set your security questions, or in this case we have just put a . in the sections. Then press the 'COMPLEATE' button

10: Decide and answer if you want to opt in?

All done, just need to add your device/s, (see our help file for this.
